3. Spreadsheets

In the diagram below, a spreadsheet has been created to show the stock of the Dairy Princess company

| | A | В | С | D | E |
|---|-----------------------|-------|---------------|-------|---|
| 1 | Dairy Princess | | | | |
| 2 | Item | Price | Quantity Sold | Total | |
| 3 | Double Cream | 0.150 | 7 | | |
| 4 | Skimmed Milk | 0.235 | 8 | | |
| 5 | Natural Yoghurt | 0.085 | 10 | | |
| 6 | Buttermilk | 0.450 | 4 | | |
| 7 | Total | | | | |
| 8 | | | | | |
| 9 | | | | | |

| Write down the cell reference of a cell that contains numeric data [1] |
|--|
| Suggest a formula that would be written in cell D3 |
| Describe how you would replicate this formula into cells D4 to D6 |
| |
| Suggest a formula that would be written in cell D7 |
| [1 |
| A new item: Strawberry Milk is to be introduced. Describe how you would alter the spreadsheet to place this item between Natural Yoghurt and Buttermilk. |
